LOGLINE

The story illustrates how a cat and a human rebuild their friendship and grow as a human (cat) being. Jin, a stray cat who was abandoned after a fire, and Aki, who regrets not being able to save him. They happen to meet again at a zoo, and this time they can speak the same language! "CHAT FOOD", a secretly developed food enabled animals to speak human language. Jin slowly opens up as he communicates with Aki, the zoo animals, and the zookeeper, Mugi. However, their every life is threatened by Jonathan, the zoo owner who plans to create military animal force using CHAT FOOD, manipulating the animals. Jin and Aki team up with their animal friends to stop Jonathan's evil plans.

Stray Cat & Mysterious Zoo

WORLD VIEW

A new venture company Anima Industries opened the **Princettia Zoo** with the slogan "Happy Zoo for every living things!", which has exploded in popularity with it.

Mysteriously, animals seem to understand human tongue!

This incredible news spread quickly by word of mouth and through the media.

However, this zoo has a secret.

In fact, Anima Industries has secretly succeeded in developing "**CHAT FOOD**", a food that would allow animals to speak human language.

This had actually make it possible for humans and animals to communicate with each other!

However, the fact that "animals can understand human language" has been kept a secret from the public.

Therefore, only in the underground backyard, which is inaccessible to the general public, the animals spend their time as if they were humans, talking with humans as equals, and spending their time in various ways, like humans!

Stray Cat & Mysterious Zoo

POINT

- **A Story of Pets and Owners**

This is a story of mutual affection between cat and ex-owner. We sometimes expect too much of others because of our love for them, and sometimes feel disappointed when our expectations are betrayed. I would be happy if you could see this story in the context of your beloved pets.

- **A comedy featuring the free-spiritedness of animals that can speak.**

In this work's zoo, the animals communicate with humans as equal. The story is told in a fun and interesting way through the unique personalities of the animals, such as the zebras that are massaged by the humans to nourish their tired bodies and the fennecs that stalk their keepers because they love them so much.

- **If we could overcome the language barrier, can we understand each other??**

This work will have a magic item called "chat food". When words are understood, communication becomes easier. However, we know very well that just because words are understood, it does not mean that our feelings are correctly conveyed to the others. We hope that this work will help people think about what communication is all about.

CHARACTER

Jin(三)

The protagonist of this story.

Jin is the willful cat looking for the owner who abandoned him.

He thinks he was abandoned in a fire by his owner, Aki. This made him distrust human beings but he would like to believe humans deep in his mind - so deep in his mind that he cannot recognize it.

He lost most of his memory before the fire including his master's face.

He has a sharp tongue, but honest and essentially straightforward in nature.

Jin has a outstanding athletic ability and shows flashy moves in the movie.

After having CHAT FOOD, he gradually knows what human is thinking and opens his mind.

CHARACTER

AKI(26)

A genius researcher who developed CHAT FOOD. Former owner of Jin.

Aki was a graduate school classmate of Jonathan.

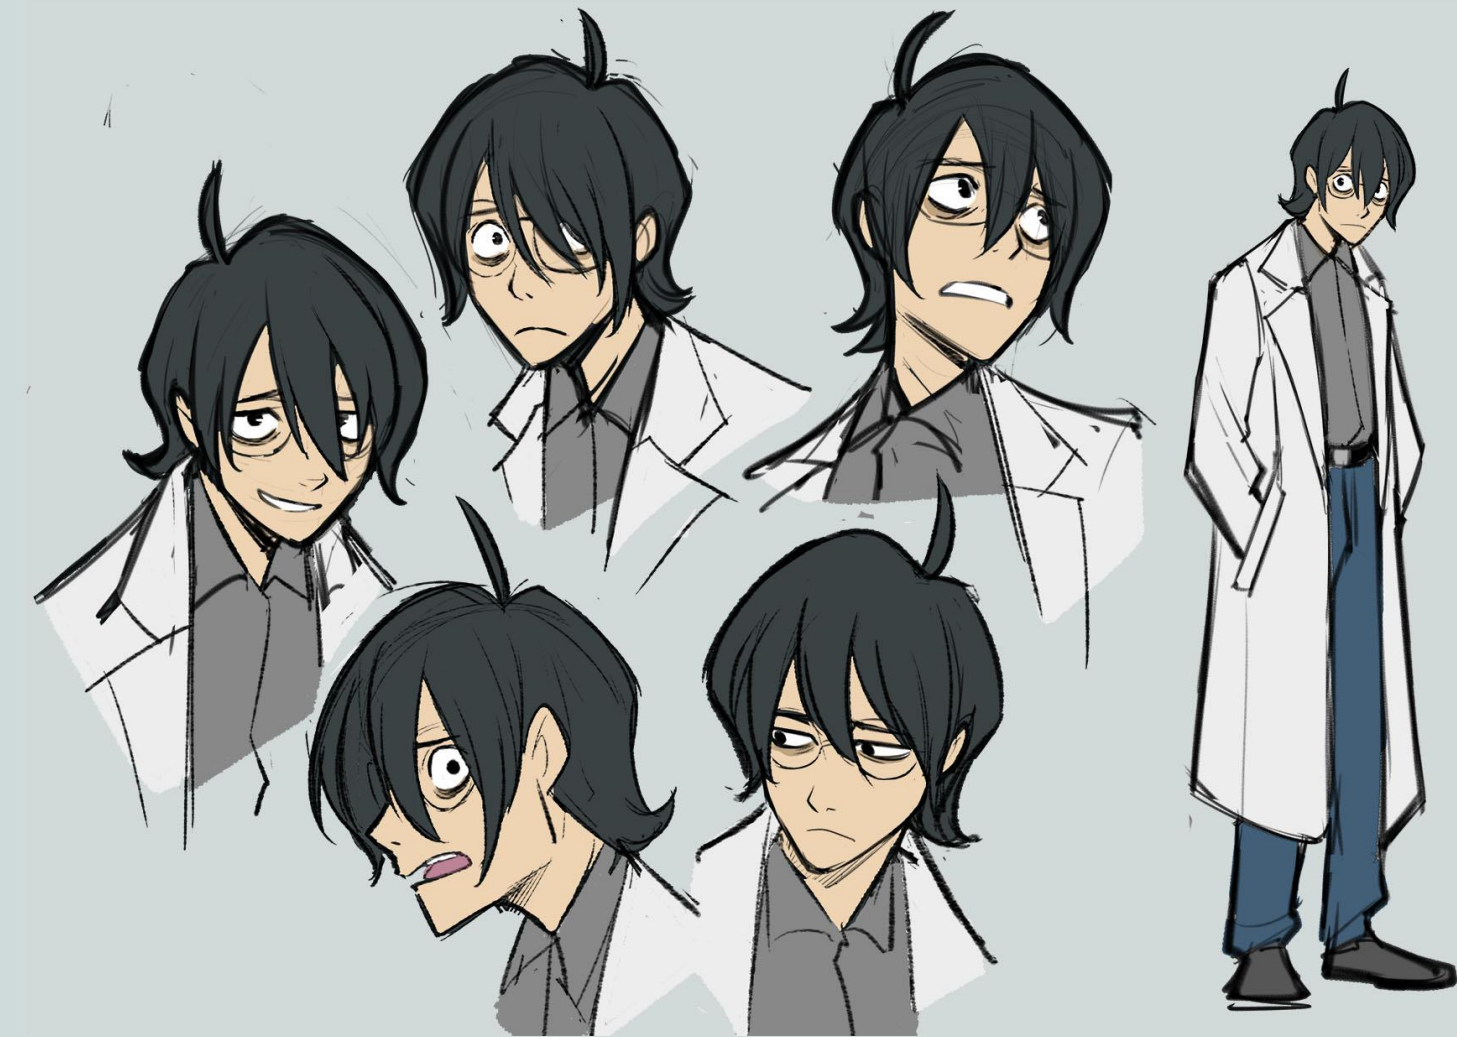

He believes that he lost his cat, Jin in a fire because he did not have enough courage to save Jin. He is not good at communication, and sometimes makes peculiar expressions such as "I want to study you (for CHAT FOOD's research)."

Because of this, he is sometimes misunderstood as a creepy guy.

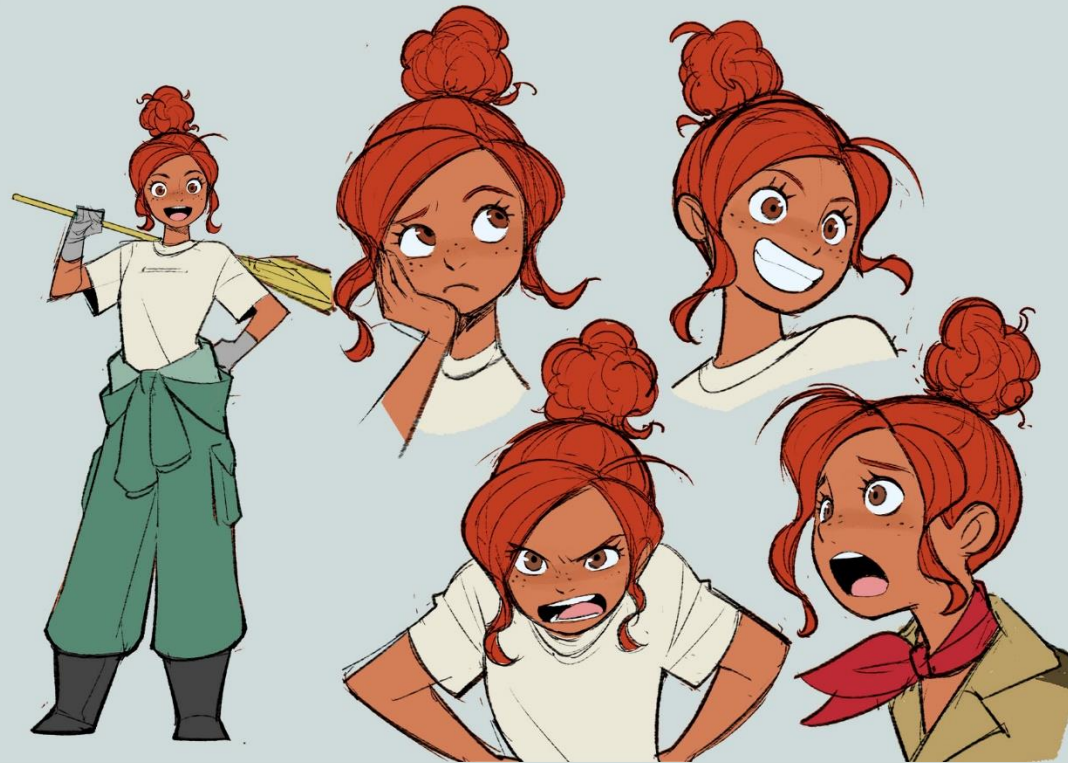

His physical ability is low, which makes him not good at sports.

Once he finds Jin, Aki realizes that Jin is his pet cat that he once lost. However, he cannot tell Jin about the truth.

Eventually, he puts his feelings into action and comes to have a heart-to-heart talk with Jin.

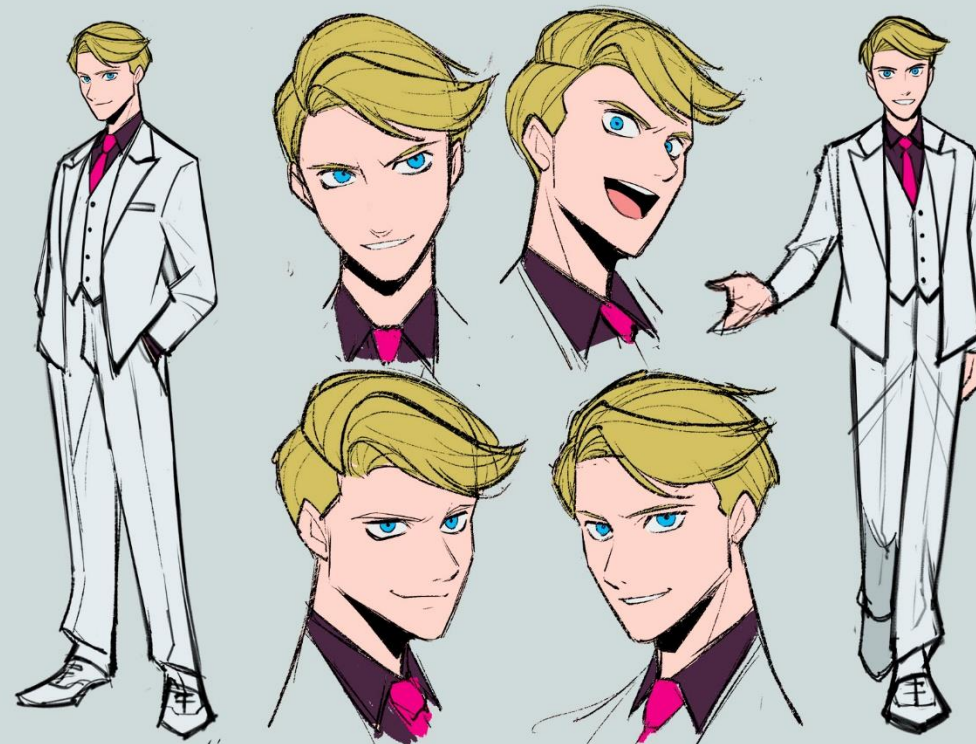

CHARACTER

MUGI(22)

The zoo keeper in Princettia Zoo.

JONATHAN(26)

CEO of Anima Industries and the owner of the Princetia Zoo.

nezumi(mouse)

A rat (with no individual name) with a smartphone on its back that lives in the backyard basement of the Princetia Zoo.

AUTHORS VIEW

“WE WANT TO REDUCE ABANDONED ANIMALS”

Animals are loved all over the world, and the number of animals living with humans as pets, as if they are human family members, is increasing every year.

However, the number of pets abandoned by human being continues to increase in proportion. Why is this happening? Why are people so easily able to abandon animals? This story is rooted in the awareness of the above issues.

Suddenly, animals are abandoned one day by the people who were kind to them and trustful. How do these animals feel when they are abandoned by humans?

We believe that it is possible to communicate with anyone, even if we do not understand each other's language.

The happiness and sense of security of being needed is not only for humans, but for animals as well.

Through the drama of Jin and Aki, we hope that people will feel these things and think about how animals and humans should relate to each other.

VALUE

“ We will express the happiness of communicating from heart to heart, no matter what they are.”

MESSAGE

“GREATNESS OF ACTING TO TELL
SOMEONE ABOUT YOUR
FEELINGS”

This film depicts humans and animals conversing on an equal footing, something that cannot be achieved in reality.

However, understanding the language does not make a successful communication.

With this film, we claim the importance to put thoughts into action.

Through this show, we hope that children around the world will learn what they should do to communicate with each other, regardless of whether they are human or animal.
